LAPP CABLE | POLYCAB CABLE | SIEMENS SWITCHGEAR | RITTAL PANEL  
TRINITY TOUCH | ELMEX TERMINALS | OMRON

## ABOUT US

### Trusted supplier of Industrial Automation, Robotics & Electrical Solutions

Established in 2014 in Pune, Maharashtra, Supreme Enterprises & Electricals Pvt. Ltd. is a wholesale supplier of industrial automation, robotics, and electrical solutions. We serve control panel manufacturers, automobile industries, SPM manufacturers, and OEMs across Pune.

Our product range includes PVC ducts, DIN rails, relay boards, switchgears (MCB, MCCB, ACB, contactors, MPCB, OLR, VFD), cables, connectors, sensors, PLC & HMI, LED lights, conduits, glands, lugs, ferrule printers, and more.

We are known for quality products, competitive pricing, and timely delivery, helping us build a strong and loyal client base.

## LAPP CABLES

LAPP Cables are globally recognized for their high quality, reliability, and long service life. Designed to meet demanding industrial requirements, LAPP cables are widely used in automation, machinery, control panels, robotics, and electrical installations.

These cables offer excellent flexibility, mechanical strength, chemical resistance, and electrical performance, ensuring safe and uninterrupted operation even in harsh environments.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
ÖLFLEX® Control Cables	Flexible control and power cables	Industrial automation, control panels	Oil resistant, flexible, long service life
ÖLFLEX® Servo Cables	Motor and servo drive cables	Robotics, CNC machines, automation systems	High flexibility, EMC protection
UNITRONIC® Signal Cables	Data and signal transmission cables	Instrumentation, control systems	Low interference, reliable data transfer
ETHERLINE® Data Cables	Industrial Ethernet cables	Industrial networking, automation	High-speed data, robust insulation
FLEXIMARK® Marking Systems	Cable marking and identification	Electrical panels, cable management	Durable, clear identification

## POLY-CAB CABLES

Polycab Cables are among India's most trusted and widely used cables, known for their superior quality, safety, and long-lasting performance. Polycab offers a comprehensive range of cables suitable for industrial, commercial, and residential applications.

These cables are manufactured using high-grade copper and insulation materials, ensuring excellent electrical conductivity, fire resistance, and durability.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
House Wires	Single & multi-core insulated wires	Residential & commercial wiring	Fire resistant, high conductivity
Flexible Cables	Multi-stranded flexible cables	Appliances, panels, machinery	High flexibility, durable insulation
Armoured Power Cables	Heavy-duty power transmission cables	Industrial power distribution	Mechanical protection, long life
Control Cables	Multi-core control signal cables	Automation & control panels	Reliable signaling, easy installation
Solar Cables	UV & weather-resistant DC cables	Solar power plants	UV resistant, high temperature tolerance

## SIEMENS SWITCHGEAR

Siemens Switchgear is globally trusted for advanced technology, superior safety, and long-term reliability. These products are designed to meet modern electrical distribution and automation requirements across industrial, commercial, and infrastructure sectors. Siemens switchgear ensures efficient power control, protection, and monitoring while complying with international safety standards.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
MCB (Miniature Circuit Breaker)	Protection against overload and short circuit	Residential & commercial panels	High safety, compact design
MCCB (Molded Case Circuit Breaker)	High-capacity circuit protection	Industrial power distribution	Adjustable protection, robust build
ACB (Air Circuit Breaker)	Main incoming and power control breaker	LT panels & substations	High breaking capacity, long life
Contactors & Overload Relays	Motor switching and protection devices	Motor control centers (MCC)	Reliable motor protection
Switch Disconnectors	Safe isolation of electrical circuits	Industrial & utility installations	High insulation, safe operation

## RITTAL PANEL

Rittal Panels are globally recognized for their superior engineering, robust construction, and reliable protection of electrical and automation components. Rittal enclosures are designed to meet international standards for industrial and commercial applications. These panels provide excellent protection against dust, moisture, and environmental conditions while ensuring efficient heat management. Rittal panels are widely used in control panels, power distribution, automation systems, and industrial installations.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
TS 8 Enclosures	Modular industrial enclosure system	Control & automation panels	Modular design, high stability
AX & KX Compact Enclosures	Compact wall-mounted enclosures	Machine & control applications	Space-saving, robust construction
Outdoor Enclosures	Weatherproof enclosures	Outdoor electrical installations	High IP rating, corrosion resistance
Panel Cooling Units	Thermal management solutions	Electrical & automation panels	Efficient cooling, energy saving
Accessories & Mounting Systems	Panel accessories and mounting parts	Panel customization	Easy installation, flexibility

## TRINITY TOUCH

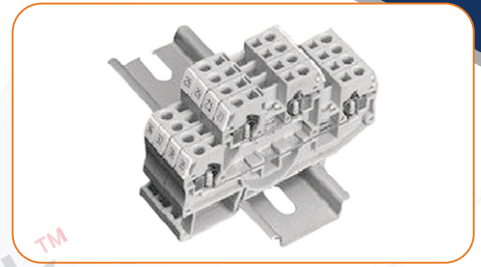

Trinity Touch offers a reliable range of electrical wiring accessories and control products designed for safety, durability, and ease of installation. These products are widely used in residential, commercial, and industrial electrical systems. Known for quality materials and precision manufacturing, Trinity Touch products ensure long service life, consistent performance, and compliance with electrical safety standards.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
Modular Switches	Stylish and durable electrical switches	Residential & commercial buildings	Modern design, smooth operation
Socket Outlets	Safe and reliable power outlets	Homes, offices, shops	High safety, strong terminals
MCBs & Distribution Boards	Electrical protection and distribution	Power control systems	Reliable protection, easy installation
Industrial Plugs & Sockets	Heavy-duty electrical connectors	Industrial power connections	High load capacity, rugged build
Wiring Accessories	Complete range of wiring solutions	Electrical installations	Durable, safe, and efficient

## ELMEX TERMINALS

Elmex Terminals are widely trusted for providing safe, reliable, and efficient electrical connectivity solutions. Designed to meet international standards, Elmex terminals are extensively used in control panels, switchgear, automation systems, and industrial wiring applications.

These terminals ensure secure connections, easy installation, and long-term performance. With high-quality insulation materials and precision engineering, Elmex terminals enhance safety and simplify panel wiring.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
Feed Through Terminals	Standard terminal blocks for wiring	Control panels, electrical enclosures	Secure connection, easy installation
Earth / Ground Terminals	Protective grounding terminals	Industrial panels, safety circuits	High safety, reliable grounding
Fuse Terminals	Integrated fuse protection terminals	Control & protection circuits	Compact design, easy fuse replacement
Disconnect Terminals	Circuit isolation and testing terminals	Maintenance & testing applications	Safe disconnection, clear indication
Power Terminals	High-current terminal blocks	Power distribution panels	High current capacity, robust build

## OMRON

Omron is a global leader in industrial automation and control solutions, offering innovative products that enhance productivity, safety, and efficiency across industries.

Omron products are widely used in manufacturing, automation systems, machine control, and process industries, delivering high reliability and advanced technology.

PRODUCT TYPE	DESCRIPTION	APPLICATION	KEY FEATURES
PLC (Programmable Logic Controllers)	Advanced control systems	Industrial automation	High-speed processing, reliability
Sensors	Proximity, photoelectric & vision sensors	Machine automation	High accuracy, long life
Relays & Timers	Switching and timing devices	Control panels	Compact, durable design
HMI (Human Machine Interface)	Touchscreen operator panels	Machine monitoring & control	User-friendly interface
Safety Products	Safety relays & light curtains	Industrial safety systems	Enhanced worker safety
